Alessandro De Rossi

Software Developer · Madrid, Spain · EU citizen
alessandrodeross@gmail.com · github.com/ade-ross · linkedin.com/in/alessandro-de-rossi

PROFILE

Software developer trained at 42 school (Florence and Madrid), with a background in systems programming in C and C++. I have built an IRC server, a Bash-like shell, a photo-sharing web app in plain Node.js, Docker-based infrastructure and, in a five-person team project, a real-time multiplayer game where I developed the JWT authentication service. Previous studies in Computer Engineering. Looking for my first software developer role.

EDUCATION

- **42 Madrid** · Outer Core (in progress) · Sep 2026 – present
- **42 Florence** · Common Core completed · Nov 2024 – Aug 2026. Project-based, peer-reviewed learning: C and C++, Unix systems, concurrency, sockets and Docker.
- **University of Padua** · Computer Engineering (coursework) · Sep 2018 – Sep 2020

PROJECTS

- **ft_transcendence** · team project (5 people). Real-time multiplayer game built as microservices. I developed the authentication service: JWT access and refresh tokens, Google OAuth, email verification, password reset and 2FA. *TypeScript, NestJS, PostgreSQL, Docker, NGINX*
- **ft_irc** · pair project. IRC server in C++98 with non-blocking sockets and `poll()`, channels, operator commands and a moderation bot. *C++*
- **Camagru** · Photo-sharing web app with no framework: own HTTP router on Node.js, PostgreSQL, Docker Compose. Webcam or upload, server-side image compositing, likes, comments with email notifications; hashed passwords, parameterized SQL, CSRF protection. *Node.js, PostgreSQL, Docker*
- **minishell** · pair project. Bash-like shell in C: parsing, pipes, redirections, builtins, processes and signals. *C*
- **inception** · Docker Compose infrastructure: NGINX with TLS, WordPress and MariaDB, with Dockerfiles written from scratch. *Docker, NGINX*
- **cub3D** · pair project. Wolfenstein-style raycasting engine: textures, doors and real-time movement. *C, MiniLibX*
- **LastSecondsLeft** · personal project. Windows tray app that shows a large countdown on top of every window when the laptop battery is about to die, then hibernates. *C#*
- **Other 42 projects:** philosophers (threads and mutexes), libft, push_swap, pipex and C++ modules 00–09.

TECHNICAL SKILLS

- **Languages:** C, C++, TypeScript, JavaScript
- **Backend:** Node.js, NestJS, PostgreSQL, JWT and OAuth authentication
- **Frontend:** HTML, CSS, JavaScript
- **Systems and infrastructure:** Linux, Docker, NGINX, processes and signals, threads and mutexes, sockets and non-blocking I/O, memory management
- **Tools:** Git, Make, Valgrind

LANGUAGES

Italian: native · **English:** B2/C1 · **Spanish:** B1 (in progress)

OTHER EXPERIENCE

- **Customer service, escape room** · May 2022 – Sep 2024. Greeting customers and helping during games.
- **Hospitality** · pizza maker's assistant at Pizzeria La Torre, Peseggia (Oct 2020 – Apr 2021); waiter, pizza delivery and cashier (summers of 2019, 2020 and 2021)
- **Summer camp counsellor** (volunteer, 2013 – 2018) · **Certifications:** pool lifeguard and BLSD (January 2024)
